

TFS Science Support & Maintenance report

TFS Maintenance Highlights

New Garage!

- **Improved camp fuel and power efficiency by consolidating many uses to one building**
 - **Warm storage moved to Garage, Dry Lab shut down.**
 - **All equipment maintenance moved to Garage, no heat usage in Tire Shop, Tool Trailer, Loader Tent, Snowmachine / Bike shop.**
 - **Garage primarily runs off of waste heat from generators, with other buildings shut down it saved 562 gallons of heating oil this quarter**
 - **Net power usage increased by 1936 KW/Hr, converts to 161 gallons of fuel for a total net savings of 401 gallons of fuel**
- **Allows for detailed winter maintenance of equipment**
- **Most maintenance & science support equipment based out of one building and nearby Connex – tools, generators, augers, snowmachines, etc.**
