OIT Follow up report on phone connections – Martha Mason

- x Phone lines have been removed from classrooms because each costs \$260 per year. Phones such as Polycoms were brought from individual units for use in the classroom. Reichart, Gruening and Brooks had analog lines that were disconnected. CRCD reconnected four rooms

information.

- Entering information into the Faculty 180 database takes time.
- Another learning process is the general understanding of using a database vs. word processing document.
- Drawback with the software itself is it has some quirks. Several screens must be navigated to add data to review, and to edit it.
- One frustration heard by the committee was that Teaching Class information entered into the system was not accurate. Michelle said this info is extracted from Banner and uploaded manually. If the class is not correct in Faculty 180, then it is because the instructor in Banner is not correct. Accurate information will be more and more important including correct start and end dates, as this is also used for electronic evaluation. Correcting banner records are done through the Dean and Registrar. For Faculty 180 questions or corrections contact Michelle Strickland or Alex Fitts.
- A frustration brought up at the faculty senate administrative committee meeting was that there was not a forum for feedback on the system. There are several ways. In addition to contacting Michelle or Alex, other options are to use the link at the Provost's website to submit a google form, use the Faculty 180 to contact the company, or submit a support ticket
- A concern brought forward was with the safety of information put into the system. Everything on the internet is likely to be hacked at some time including this database. Also, the university email is a google system, so that is available to others. Faculty evaluations do not currently go into the Faculty 180 system but when they do, privacy will be an issue. Martha talked about the firewalls in place.
- Dean should pull up the information for evaluation after a faculty member has submitted it.

Feedback on use of Zoom and google hangouts

- x Overall comments were positive. Audio/visual seemed to work better with zoom than google hangouts for some. The internet connection for each participant will impact their experience. Having all mute their microphones except for the person speaking seems to help with the issue of echoes.

Items for next month's agenda

- Security report - Martha will request the chief security officer address the information on technology safety, where UAF stands on this issue, how many hacking events recently or currently, also include hacking into video conferencing system. Focus on safety of personal information such as is in Faculty 180.
- OIT feedback on videoconferencing – 0 Tc (f)5(o)-8[moxsonalhand
